

Invitation to Serve as External SRC Member/Chairman

Please provide below details:

- 1. Name of the External SRC Member *: Dr. Jagadeesh M S**
- 2. Designation/Position of the External SRC Member *: Associate Professor**
- 3. Contact No. of the External SRC Member *: 9247880488**
- 4. Email of the External SRC Member *: jagadeesh@nitttrkol.ac.in**
- 5. LinkedIn Profile of the External SRC Member *: <https://www.linkedin.com/in/dr-sreejagadeesh-malla-09996488/>**
- 6. Institute/Organization Name of the External SRC Member *: National Institute of Technical Teachers' Training and Research, Kolkata**
- 7. Scopus Profile Link *: 57220890140**
- 8. SCIE Paper1 Title *: COVID-19 outbreak: An ensemble pre-trained deep learning model for detecting informative tweets**
- 9. Journal Name *: Applied Soft Computing**
- 10.**
- 11. Quartile *: Q1**
- 12. Impact Factor *: 6.6**
- 13. DOI *: <https://doi.org/10.1016/j.asoc.2021.107495>**
- 14. SCIE Paper2 Title *: Novel fuzzy deep learning approach for automated detection of useful COVID-19 tweets**
- 15.**
- 16. Journal Name *: Artificial Intelligence in Medicine**
- 17. Quartile *: Q1**

18. Impact Factor *: 6.2

19. DOI : <https://doi.org/10.1016/j.artmed.2023.102627>

And Also

Summary of All My Research Publications

Paper Title	Journal	Quartile	Publisher	Impact Factor
Enhanced stock market forecasting using dandelion optimization-driven 3D-CNN-GRU classification	Scientific Reports	Q1	Springer Nature	3.9
Secure 3D: Secure and Energy Efficient Localization in 3D Environment using Wireless Sensor Networks	Wireless Personal Communications	Q2	Springer	2.2
A review of deep learning techniques for disaster management in social media: trends and challenges	The European Physical Journal Special Topics	Q2	Springer	2.891
Artificial intelligence-	Health Information	Q1	Springer	4.1

based framework to identify the abnormalities in the COVID-19 disease and other common respiratory diseases from digital stethoscope data using deep CNN	Science and Systems			
Novel fuzzy deep learning approach for automated detection of useful COVID-19 tweets	Artificial Intelligence in Medicine	Q1	Elsevier	6.2
Selection of Features Using Adaptive Tunicate Swarm Algorithm with Optimized Deep Learning Model for Thyroid Disease Classification	Ingenierie des Systemes d'Information	Q2	Springer	1.74
Fake or real news about COVID-19? Pretrained	The European Physical Journal Special Topics	Q2	Springer	2.891

transformer model to detect potential misleading news				
An Improved Machine Learning Technique For Identify Informative Covid-19 Tweets	International Journal of System Assurance Engineering and Management	Q2	Springer	1.6
Enhanced Route Optimization for Wireless Networks Using Meta-Heuristic Engineering	Computer Systems Science and Engineering	Q3	TechScience Press	1.486
COVID-19 outbreak: An ensemble pre-trained deep learning model for detecting informative tweets	Applied Soft Computing	Q1	Elsevier	6.6
